Description

Preconditions: We have at least a product in our shopping cart.

Reproduction steps:
1. Acces the shopping cart
2. Press the "Procced to checkout" button
3. In the "Shipping methods" section select other option

Expected results: The shipping methods has changed successfully.

Actual results: We cannot change the Shipping methods because we don't have other option.

Description

Preconditions: We have acces to Luma Sign in page

Reproduction steps:
1. Acces the Login page on Luma
2. Press the "Signin with Facebook" button

Expected results: The link will send us to a new window where we will be able to log in to Luma with Facebook credentials.

Actual results: In the window that opens, an error message appears: "App not active
This app is not accessible right now and the app developer is aware of the issue. You will be able to log in when the app is reactivated."

Description

Precondition: We can access the "Create a new account" page in the Luma application

Reproduction steps:

1. Acces the "Create an account" page
2. Fill all the required fields with valid values
3. In the Phone number fill "123" or an invalid phone number
4. Press "Create an account"

Expected results: The account shoudn't be created because the Phone number field is a requirement

Actual results: The account is created even though we used an invalid phone number.

[Magento 2 Admin Demo](#) (TMT2-1)

[TMT2-21] We check if we can use an invalid phone number in the "Phone Number" field on the "Create new account" page.

Description

Magento 2 brings new default theme under the name “Luma”. Luma is a very clean, easy on the eyes and elegant theme that has adopted better usability practices than it’s predecessor, Magento 1 default “Madison Island” theme.

A LUMA theme is a **pre-designed template** or **group of files** that determine appearance and feel of a Magento-powered store. A theme comprises several aspects that define visual look of storefront, such as **layout, typography, color scheme, images,** and **widgets**.

Luma is one of two out-of-the-box themes accessible when you decide to establish an eCommerce store with Magento, and it is the most popular. In layman’s words, it’s a collection of **ready-made page layouts, themes**, and **features** that you can use to develop business.
