## Description

Welcome to the next generation of the world's leading digital commerce platform! Built on open-source technology, Magento Commerce provides online merchants with unparalleled flexibility and control over the look, content, and functionality of their online stores. Magento's intuitive Admin features powerful marketing, search engine optimization, and product management tools that give you the power to create sites that are tailored to your unique business needs. Robust and scalable, Magento offers you a stable, secure, and customizable solution for your growing business.

Magento 2 Demo is the live demo site that brings the real experience on Mageplaza extensions instead of installing Magento 2 on localhost. Magento 2 Demo with sample data allows you interacting as a customer in the frontend and working as an admin in the backend.

Using the online **Magento 2 Admin Demo** is the perfect solution that helps you enjoy all ulities of Magento 2 without any installation. The demo is guaranteed to work well by the timely assistance of Mageplaza Technical Team.

## Description

Magento 2 brings new default theme under the name "Luma". Luma is a very clean, easy on the eyes and elegant theme that has adopted better usability practices than it's predecessor, Magento 1 default "Madison Island" theme.

**A LUMA theme** is a **pre-designed template** or **group of files** that determine appearance and feel of a Magento-powered store. A theme comprises several aspects that define visual look of storefront, such as **layout, typography, color scheme, images,** and **widgets**.

Luma is one of two out-of-the-box themes accessible when you decide to establish an eCommerce store with Magento, and it is the most popular. In layman's words, it's a collection of **ready-made page layouts, themes**, and **features** that you can use to develop business.
